Simulation Exercise – Presentation
Virtual Prep/Virtual Delivery
Selection & Assessment
Data & Analytics_Advanced Analytics_Senior Lead Quantitative Analytics Specialist
Job Code - 100625
10/30/2026

Candidate instructions

As the next step in the selection process, you are being asked to prepare for and deliver a presentation on a job-related topic. Review these instructions carefully and in full.

Presentation preparation:

- Review the **Detailed task description** section below.
- You will have **3 days** to prepare for your presentation.
- Be sure to keep track of your own time and plan accordingly.
- If you require an accommodation to complete this exercise, please contact your recruiter immediately.
- You must complete this exercise independently.
- You may not plagiarize another person's work.
- *Your work will NOT be evaluated for its compliance with company-specific policy.*

Presentation delivery:

- You will have **20 minutes to deliver your presentation followed by a 15-minute technical walkthrough and demonstration.**
- You will deliver your presentation via video.
- Refer to the meeting invitation and/or the body of the email you received for additional presentation delivery details.
- Be sure to keep track of your own time and plan accordingly.
- You will be asked to respond to questions during and/or at the conclusion of your presentation.

Submission requirements:

- Submit a copy of your presentation materials to the Administrator by the specified deadline. If your presentation materials are not received by the deadline, you will be removed from consideration. See the body of the email you received for detailed submission instructions.

Detailed task description

- You are a Senior Lead Quantitative Analytics Specialist supporting the development of Artificial Intelligence (AI) solutions. Your team is exploring ways to help branch employees efficiently access information contained within operational procedures.
- Your task is to design and build a generative AI-enabled conversational chat solution grounded in the attached procedural documents (11) and present your approach and solution to a senior leadership audience.
- Specifically, you should:
    - Develop a functional chat solution that answers questions based on the provided procedural documents.
    - Prepare approximately **five to six PowerPoint (PPT) slides** describing your solution methodology, architecture, technology choices, and key design decisions.
    - Explain how you processed and organized the procedural documents, including your content-chunking and information-retrieval approach.

WELLS FARGO

  - Describe how you would test and measure the solution's performance, including the accuracy, relevance, completeness, and conciseness of its responses.
  - Address the user experience and how the solution handles follow-up questions.
  - Demonstrate the chat solution by asking questions based on the provided procedure documents and showing how the solution responds, including how it handles follow-up questions.
- Be prepared to explain your technical approach and key design decisions.
- You are expected to use generative AI in developing your solution. You may use the AI models, platforms, development tools, and other resources of your choice. Be prepared to explain how you used generative AI, the decisions you made, and how you evaluated and validated the resulting outputs.
- **Do not include or submit source code** as part of your presentation materials or solution demonstration.
